TESTIMONIAL.

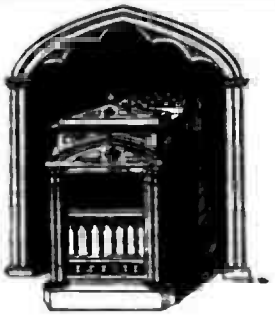
From the Rev. MATTHEW O'BRIEN,
(Professor of Natural Philosophy and Astronomy) M.A., F.R.S., &c., King's College.

Norwood, 22nd June, 1846.

I beg to certify that one of Mr. Cundy's Patent Stoves was put up in my lecture-room at King's College last year, in place of a common stove (of Arnott's construction, I believe). I have no hesitation in saying, from actual experience, that Mr. Cundy's Stove is far superior both in producing warmth over the whole room, and in promoting ventilation, without disagreeable currents of air, or close smell.

MATTHEW O'BRIEN.

FOR CHURCHES, CHAPELS, SCHOOLS, WAREHOUSES, PRIVATE DWELLINGS, &c. &c.



MOTT'S PATENT STOVES,

After Twenty Years' Trial, still maintain their decided superiority. They give twice as much heat as any other stove, with a smaller consumption of fuel; they burn for eight or ten hours without replenishing; they do not generate offensive and dangerous gases; and they have, when lighted, a very

BRILLIANT AND CHEERFUL APPEARANCE FROM THEIR TRANSPARENT FRONTS.

By the addition of a Boiler and Hot-Water Pipes, they may be made to heat, at the same time, DISTANT APARTMENTS, CONSERVATORIES, &c. The are made in various sizes and patterns, and the PRICES have recently been GREATLY REDUCED.

A STOVE AT TWELVE GUINEAS, AS SHEWN AT SIDE, WILL WARM A SMALL CHURCH.

THE MODERATOR STOVE GRATE, as used for Parliament-halls, Consulting-rooms, Warerooms, and Public Offices, gives an intense but perfectly pure heat: has a most cheerful appearance, perfect ventilation, is a decided cure for smoky chimneys, and consumes only 28 lbs. weight of coal in twelve hours. In daily use at the inventor and manufacturer's, METHLEY'S, St. Pritt-street, Soho. Price £5.

SYLVESTER'S GRATES.—These Grates do not now require either description or recommendation, their unequalled comfort and economy in fuel having been tested, with perfect satisfaction, by numbers of the nobility and first families in the kingdom.

The improvements recently patented do away with the necessity of an ash-pit, and obviate all difficulty in firing. They are made in every style of elegance, from the specimen exhibited by the Society of Arts in London in 1846, and to the Birmingham Exhibition of this year, down to the most inexpensive form for a bedroom.

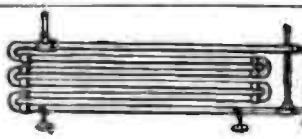
Within the last twenty years some hundreds of buildings have been heated upon this plan, and the parties for whom they were executed are constantly expressing their satisfaction, also their willingness to vouch for their efficiency.

BENJAMIN FOWLER, late of 68, Dorset-street, removed to the new factory, Whitefriars-street, Fleet-street.



CONSERVATORIES and PUBLIC BUILDINGS can be HEATED in the most ECONOMICAL WAY by TYLOR'S IMPROVED CIRCULATING COPPER BOILERS.
